

## GENETICS CONFERENCE SCHEDULE

A required class meeting is scheduled for Wednesday, Sept. 3, from 11:30-12:30 PM in Leischner Hall (Room 390) to discuss the genetics project requirements and to answer your questions. Your group should meet as often as necessary to complete the project (including the Sept. 9 Small Group session). Student presentations are scheduled in different rooms on Sept. 24, 12:30-5:00. You should plan to attend all student presentations in your room, in part because there will be questions on Exam 3 on the content of these talks.
